

THE ARCHES IN THE ALABAMA HILLS

You are treated to a remarkable display of nature's handiwork in the Alabama Hills Recreational Area. There are incredible rock formations dotting the landscape as far as the eye can see. You can't help but be overcome by the sense of wonder and amazement at the sea of golden granite boulders rising up from the desert floor. Tucked away here and there are rock arches formed by time and the elements. These massive boulders have been chiseled away leaving impressive holes through the center forming perfect archways. Most of the arches that have been found have an East/West view. Come into the Chamber office for a map to a couple of the arches, or go exploring on your own and see how many you can find.
